

How contagious is the

DELTA
Variant ?

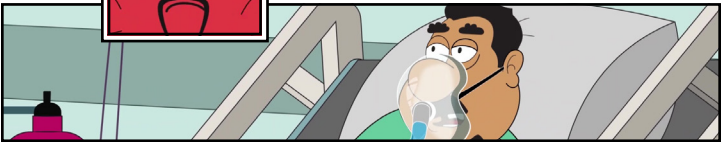

EARLIER...

**Now they
are making fake
variants just to scare
off public.**

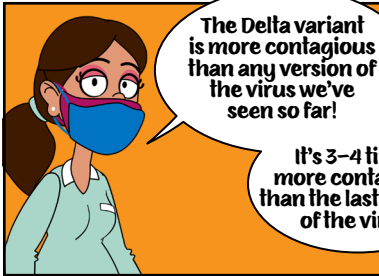

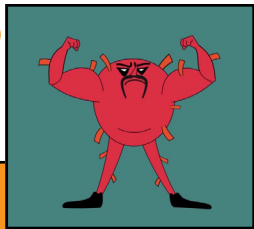

Tio Rigo has the Delta variant.

Susana?

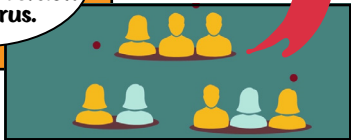

How is it different from the other variants?

The Delta variant is more contagious than any version of the virus we've seen so far!

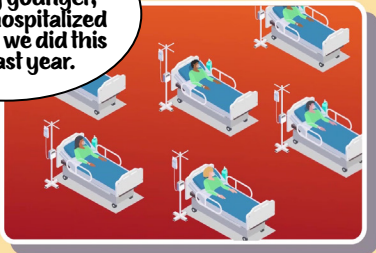

It's 3-4 times more contagious than the last version of the virus.

And it makes people of all age groups sicker faster.

It's why we're seeing so many younger, healthy hospitalized now than we did this time last year.

And in addition to the usual Covid-19 symptoms, Sinus congestion, runny nose and sore throat can indicate that you have the Delta variant.

Sinus Congestion

Runny Nose

Sore Throat

and it can cause major damage to your lungs.

We have to be extra careful Mama Lucha... Our best chance against this variant is for all of us to get the vaccine.

Somos miembros de la comunidad Hispana/Latinx en Carolina del Norte, trabajando juntos para promover la importancia de la prevención y vacunas contra el COVID-19.
