

# Will the vaccine make me sick?

## Side effects of the vaccine.

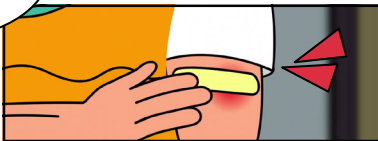

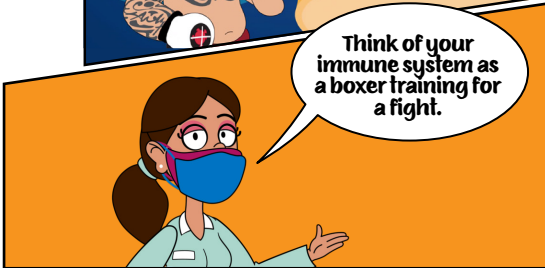

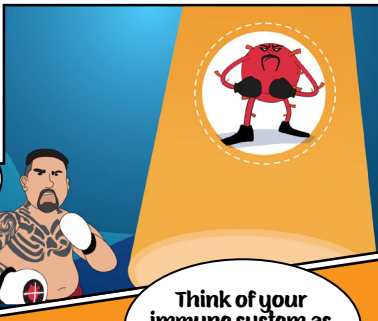

**Having symptoms after the vaccine is perfectly normal  
Mama Lucha.**

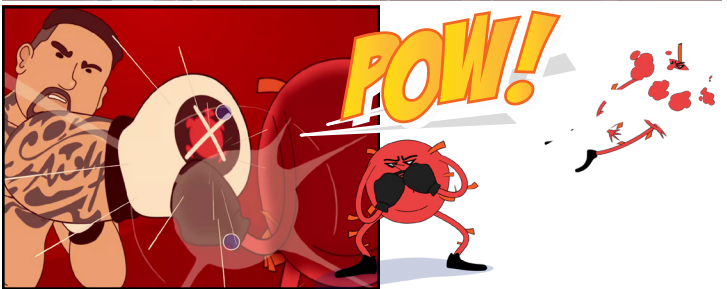

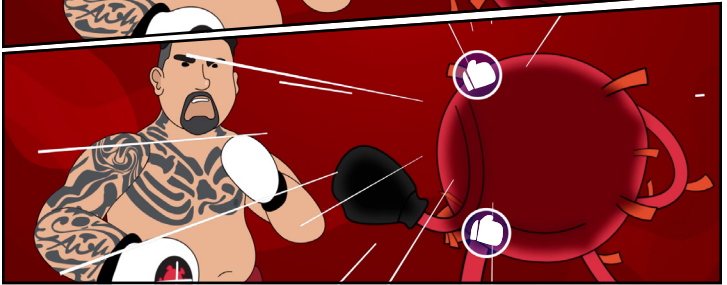

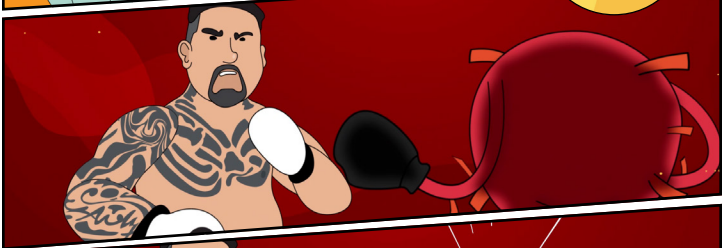

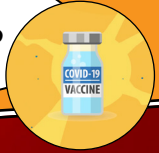

**Its your immune system learning to fight the virus.**

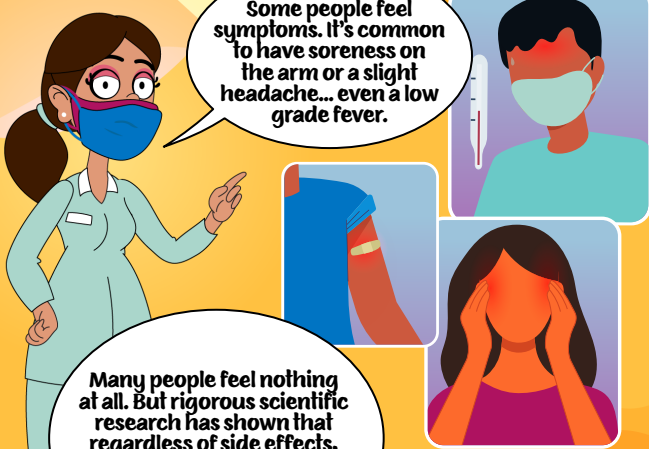

The vaccine gives your immune system the information it needs to identify the oponent's weaknesses.

**Some people feel symptoms. It's common to have soreness on the arm or a slight headache... even a low grade fever.**

**Many people feel nothing at all. But rigorous scientific research has shown that regardless of side effects, the vaccine is very good at teaching your body how to fight the virus.**

Thankyou  
Susana, I feel much  
better now knowing  
this is a normal part of  
getting vaccinated.

Should we just  
leave him that  
way? ... He's so  
peaceful.
